eHealthBox v3 Consultation WS	3.2	https://www.ehealth.fgov.be/ehealthplatform/nl/service-beveiligde-elektronische-brievenbus-ehealthbox

General information

Restrictions

- A person cannot be defined as a substitute if he is already absent for this period (or part of the period).
- It is however possible to introduce an OoO while being a substitute for someone else.
- A person may be substitute for several other persons.
- The absent person and his substitutes are persons, not organizations.
- A person is identified by his ID and his quality.
- There may be maximum five substitues per OoO.
- A maximum of ten periods OoO may exist per eHealthBox.
- OoO periods may not overlap.
- A period may not end later than J + 1 year.
- A period can last up to 1 year.
- The end date is mandatory.

A WS request contains one period and a maximum of five substitutes may be specified for that period.
The OoO activates automatically when the time is reached.

GetOoOList

The GetOoOList method is used to list all inserted OoO for the considered eHealthBox. The list contains all OoO:
past, active and future OoO. The OoOId returned can further be used to delete an OoO.

Request

- Example request

Response

The response contains a success status code and as many OoO elements as there are OoO in the considered
eHealthBox. Each element contains all OoO data when it was inserted.

- Example response

Basic flow

Flow	Specifications	
Unknown macro: 'drawio'	**ID**	UC408-BF
	Name	Set an out-of-office with 1 substitute
	Description	/
	Actor(s)	Two healthcare professionals: • One who will be OoO. • One who will be the substitute.
	Requirements	/
	Trigger	A user wants to set an out-of-office.
	Precondition(s)	• The user is logged in. • The user wants to set an out-of-office.

	Flow	1. see Use case: login.
