

TS-202 (ATH-TS-18): Consult the therapeutic links of a patient using the GetTherapeuticLink method - the REST version

User story

- *As a patient I want to login into the application (MAIN) So that I consult the therapeutic links between me and the Health Care Parties*

Initial data:

- the patient must have at least one therapeutic link between Health Care Parties and himself

Test script ID	Test Actions				Assertion
ATH-TS-14-01	Seq	Actor	Action	Automatic/Manual	<p>When the test actions are performed the following assertions must be checked:</p> <p>MAIN/TEST:</p> <ul style="list-style-type: none">• the content of the therapeutic links displayed into the application (MAIN) must correspond to the test request.
	1	MAIN	Start an identification action	Automatic: could be automate but cannot be generic since the applications to test have all a different layout.	
	2	CSAM	Login in with eid / TO TP / itsME	see TS 5,6 or 7	
	3	eHealth-IDP	Select the citizen as profile	Could be difficult to automate as CSAM and MAIN are different applications	
	4	MAIN	List the therapeutic links of the citizen	Automatic	
	5	TEST	Make a request getting the therapeutic links of the patient	Automatic
