TS-302 (ATH-TS-19): Consult the therapeutic exclusion of a patient using the GetTherapeuticExlusion method - the REST version

User story

- ***As a*** patient ***I want to*** *login into the application (MAIN)* **So that** *I consult the list my therapeutic exclusions*

Initial data:

- the patient must have at least one therapeutic exclusion
- user must be logged in MAIN (cf TS 5, 6 or 7)

Test script ID	Test Actions	Assertion
TS-302	<table><tr><th>Seq</th><th>Actor</th><th>Action</th><th>Automatic/Manual</th></tr><tr><td>1</td><td>MAIN</td><td>Start an identification action</td><td>Automatic: could be automate but cannot be generic since the applications to test have all a different layout.</td></tr><tr><td>2</td><td>CSAM</td><td>Login with **eid** / **TOTP** / **itsME**</td><td>see TS-001</td></tr><tr><td>3</td><td>eHealth-IDP</td><td>Select **citizen** as profile</td><td>Could be difficult to automate as CSAM and MAIN are different applications</td></tr><tr><td>4</td><td>MAIN</td><td>Display the therapeutic exclusion list of the citizen</td><td>Automatic</td></tr><tr><td>5</td><td>TEST</td><td>Make a request getting the therapeutic exclusion of the patient</td><td>Automatic</td></tr></table>	When the test actions are performed the following assertions must be checked: MAIN/TEST: - the content of the therapeutic exclusion displayed into the application (MAIN) must correspond to the test request.
