

TS-007 (ATH-TS-24): Change a mandate

User story

- As a user I want to change my profile So that the application (MAIN) could display relevant information related to my profile

Initial data/state:

- a mandate with a 3rd person must be defined with mandates-csam (MD-CSAM) application. The principal must give a mandate to the agent corresponding to a profile defined into the application.
- The user must be logged out of MAIN (cf TS-003) in order to change his mandate
- Application profile configuration must be fill in (see [Test Scripts: Athena](#))

Test script ID	Test Actions				Assertion
TS-007	Seq	Actor	Action	Automatic/Manual	<p>When the test actions are performed the following assertions must be checked:</p> <p>MAIN application:</p> <ul style="list-style-type: none">The application must display correct information/layout following the chosen mandate (OLD and NEW ones) <p>eHealth endpoint:</p> <ul style="list-style-type: none">The IAM session should be openThe IDP session should be open with the corresponding mandateIt redirects to the MAIN application
	1	MAIN	Login into the application and choose the OLD mandate	Automatic: see TS-001	
	2	MAIN	Global logout from the application	Automatic: could be automated but cannot be generic since the applications to test have all a different layout. See TS-003	
	3	MAIN	Start a new identification action to choose the NEW mandate	Automatic: could be automated but cannot be generic since the applications to test have all a different layout.	
	4	CSAM	Login via eid / TOTP / itsME	Automatic: see TS-001	
	5	eHealth-IDP	Consult the list of mandates	Could be difficult to automated as CSAM and MAIN are different applications	
	6	eHealth-IDP	Choose the NEW mandate	Could be difficult to automated as CSAM and MAIN are different applications	
	7	MAIN	/	/
