

TS-402: Read message

Feature

| | |
|-----------------------------|--|
| User story | As a user I want to be able to read a message So that I am able to know what another user sent me |
| Use case | UC-402: Read message |
| Test data | The test data is added automatically when starting the automated test scripts. The test data can be found in the project at: <ul style="list-style-type: none">• src/test/resources/testdata/readMessages.json |
| Expected result | Check the response of the webservice call. |
| Actual result | Check the front-end of the application under test. |
| Test pass conditions | <p>The following values need to be verified:</p> <ul style="list-style-type: none">• Document title• Document filename• Patient INSS• Is important• Is encrypted• Document content <p>The following values need to be verified for every attachment:</p> <ul style="list-style-type: none">▪ Annex title▪ Annex filename▪ Annex content <p>If the message is in the inbox:</p> <p>The following values need to be verified:</p> <ul style="list-style-type: none">▪ Sender first name▪ Sender last name▪ Sender quality <p>If the message is in the sent box:</p> <p>The following values need to be verified:</p> <ul style="list-style-type: none">▪ Destination first name▪ Destination last name▪ Destination quality |

Scenarios (Cucumber)

readMessage.feature

#Remove the @ignore-tag(s) of scenarios you want to start testing.

@ignore

Feature: TS-402: Read message

As a user

I want to be able to read a message

So that I am able to know what another user sent me

@ignore

Scenario: Read a basic message from the inbox

Given user is logged in

When user is consulting the INBOX

And user reads the 'read: basic' message

Then the 'read: basic' message is shown correctly in the INBOX

@ignore

Scenario: Read a message from the sent box with two recipients

Given user is logged in

When user is consulting the SENTBOX

And user reads the 'read: two recipients' message

Then the 'read: two recipients' message is shown correctly in the SENTBOX

@ignore

Scenario: Read an encrypted message

Given user is logged in

When user is consulting the INBOX

And user reads the 'read: encrypted' message

Then the 'read: encrypted' message is shown correctly in the INBOX

@ignore

Scenario: Read a message with an attachment

Given user is logged in

When user is consulting the INBOX

And user reads the 'read: attachment' message

Then the 'read: attachment' message is shown correctly in the INBOX

@ignore

Scenario: Read a message with two attachments

Given user is logged in

When user is consulting the INBOX

And user reads the 'read: attachments' message

Then the 'read: attachments' message is shown correctly in the INBOX

@ignore

Scenario: Read an encrypted message with an attachment

Given user is logged in

When user is consulting the INBOX

And user reads the 'read: encrypted with attachment' message

Then the 'read: encrypted with attachment' message is shown correctly in the INBOX
