

TS-406: Acknowledgements

Feature

User story	As a user I want to know the acknowledgments status of my sent message In order to know if my recipient has received/read it
Use case	UC-406: Acknowledgments
Test data	The test data is added automatically when starting the automated test scripts. The test data can be found in the project at: <ul style="list-style-type: none">• src/test/resources/testdata/readMessages.json
Expected result	Check the response of the webservice call.
Actual result	Check the front-end of the application under test.
Test pass conditions	The following values need to be verified for every recipient: <ul style="list-style-type: none">• Recipient ID• Recipient name• Recipient quality• Published• Received• Read

Scenarios (Cucumber)

acknowledgments.feature
<pre>#Remove the @ignore-tag(s) of scenarios you want to start testing. @ignore Feature: TS-406: Acknowledgments As a user I want to know the acknowledgments status of my sent message In order to know if my recipient has received/read it @ignore Scenario: Verify an acknowledgment status with one recipient Given user is logged in When user is consulting the SENTBOX And user reads the 'read: basic' message And user requests the acknowledgment status Then the acknowledgment status of the 'read: basic' message is shown correctly @ignore Scenario: Verify an acknowledgment status with multiple recipients Given user is logged in When user is consulting the SENTBOX And user reads the 'read: two recipients' message And user requests the acknowledgment status Then the acknowledgment status of the 'read: two recipients' message is shown correctly</pre>
