Used documentation

Cookbook	Version	Location
eHealthBox v3 Consultation WS	3.2	https://www.ehealth.fgov.be/ehealthplatform/nl/service-beveiligde-elektronische-brievenbus-ehealthbox

General information

Restrictions

- A person cannot be defined as a substitute if he is already absent for this period (or part of the period).
- It is however possible to introduce an OoO while being a substitute for someone else.
- A person may be substitute for several other persons.
- The absent person and his substitutes are persons, not organizations.
- A person is identified by his ID and his quality.
- There may be maximum five substitutes per OoO.
- A maximum of ten periods OoO may exist per eHealthBox.
- OoO periods may not overlap.
- A period may not end later than J + 1 year.
- A period can last up to 1 year.
- The end date is mandatory.

A WS request contains one period and a maximum of five substitutes may be specified for that period.
The OoO activates automatically when the time is reached.

InsertOoO

The InsertOoO method is used to insert an OoO for the considered eHealthBox. In order to insert an OoO for another eHealthBox, BoxId can be used. There are a number of rules and limitations to respect as described in [Restrictions](#).

Request

Only one OoO can be inserted by request, but multiple substitutes may be specified.

- [Example request](#)

Response

The response is "Success" without further details if everything went right. Otherwise the wrong or absent substitutes will be returned in the response as detailed below.

- [Example response](#)
