TS-203 (ATH-TS-18): Consult the therapeutic links of a patient using the GetTherapeuticLink method - the REST version

Aller directement à la fin des métadonnéesAller au début des métadonnées

User story

- **As a** physician **I want to** login into the application (MAIN) **So that** I consult the therapeutic links between me and the Health Care Parties

Initial data:

- the patient must have at least one therapeutic link between Health Care Parties and himself

Test script ID	Test Actions	Assertion
ATH-TS-14-01	<table><tr><td>Seq</td><td>Actor</td><td>Action</td><td>Automatic/Manual</td></tr><tr><td>1</td><td>MAIN</td><td>Start an identification action</td><td>Automatic: could be automate but cannot be generic since the applications to test have all a different layout.</td></tr><tr><td>2</td><td>CSAM</td><td>Login in with **eid** / **TOTP** / **itsME**</td><td>see TS-001</td></tr><tr><td>3</td><td>eHealth-IDP</td><td>Select the **physician** as profile</td><td>Could be difficult to automate as CSAM and MAIN are different applications</td></tr><tr><td>4</td><td>MAIN</td><td>List the therapeutic links of the citizen</td><td>Automatic</td></tr><tr><td>5</td><td>TEST</td><td>Make a request getting the therapeutic links of the patient</td><td>Automatic</td></tr></table>	When the test actions are performed the following assertions must be checked: MAIN/TEST: - the content of the therapeutic links displayed into the application (MAIN) must correspond to the test request.
