

TS-405: Move message

Feature

User story	As a user I want to move messages between boxes In order to sort them
Use case	UC-405: Move message
Test data	The test data is added automatically when starting the automated test scripts. The test data can be found in the project at: <ul style="list-style-type: none">• src/test/resources/testdata/moveMessages.json
Expected result	Check the response of the webservice call.
Actual result	Check the front-end of the application under test.
Test pass conditions	Verify that the message is correctly moved to the specified box.

Scenarios (Cucumber)

moveMessage.feature
<pre>#Remove the @ignore-tag(s) of scenarios you want to start testing. @ignore Feature: TS-405: Move message As a user I want to move messages between boxes In order to sort them @ignore Scenario: Move a message from inbox to bin inbox Given user is logged in When user is consulting the INBOX And user moves the 'move: to bin inbox' message to the BININBOX Then the message has been moved correctly to the BININBOX @ignore Scenario: Move a message from sent box to bin sent box Given user is logged in When user is consulting the SENTBOX And user moves the 'move: to bin sent box' message to the BINSENTBOX Then the message has been moved correctly to the BINSENTBOX @ignore Scenario: Move a message from bin inbox to inbox Given user is logged in When user is consulting the BININBOX And user moves the 'move: to inbox' message to the INBOX Then the message has been moved correctly to the INBOX @ignore Scenario: Move a message from bin sent box to sent box Given user is logged in When user is consulting the BINSENTBOX And user moves the 'move: to sent box' message to the SENTBOX Then the message has been moved correctly to the SENTBOX</pre>
