 - Description
- S15R10: Intended vs Delivered Medication
 - Expected results
 - Verification table

Scope

This page contains the Kmehrmessages for testing that the correct medication is shown, when both 'intended' and 'delivered' medication are present in the transaction.

Instructions for EVS use

This [EVS export file](#) contains all the MSE transactions used for the test.

Before starting the test, the export file should be uploaded using the EVS-action REPLACE and your own test patient.

The EVS parameter writeAsIs must be set to *false*.

Description

After reading the medication scheme, the results can be verified in the SUT.

Both in the caretaker and patient UI (and print) the 'delivered' medication should be shown, if it is present in the transaction. The results can be compared to the 'Verification Table'.

Depending on the SUT, the visualisation may vary slightly.

Intended VS Delivered

"<intendedname>", the name of the prescribed medication by the doctor, can, in the case of prescription on substance name or occurring substitution, differ from the "<deliveredname>", which is the name of the medication that the pharmacist actually delivers to the patient.

If the "<deliveredname>" is available and differs from the "<intendedname>" the "<deliveredname>" must be displayed.

S15R10: Intended vs Delivered Medication

Expected results

- **TS-1:** There is a medicationscheme with 4 medications
- **TS-2:** The medication in the 'Shown Medication' column of the 'Verification Table' are shown in the patient print (and UI)

- **TS-3:** The medication in the 'Shown Medication' column of the 'Verification Table' are shown in the caretaker print (and UI)
- **TS-4:** There are no issues with the visualisation

Verification table

EVSREF	Intended Medication	Delivered Medication	Shown Medication
100	Aspirine 500 mg (36 bruistabletten)		Aspirine 500 mg (36 bruistabletten)
101	DAFALGAN FORTE AGR BRUIS 500MG TABL 32	Cardegic 160 mg (30 zakjes)	Cardegic 160 mg (30 zakjes)
102	rosuvastatine 40 mg (or.)		rosuvastatine 40 mg (or.)
103	rosuvastatine 15 mg (or.)	Rosuvastatine Mylan filmomh. tabl. 98 x 40 mg	Rosuvastatine Mylan filmomh. tabl. 98 x 40 mg
