

EFRO 1302 Digitale zorg ondersteuning in de praktijk van Limburg naar Vlaanderen

This page is under construction

Dear software vendors of cure / care / wellbeing applications in Flanders,

Thank you for consulting the EFRO-1302 imec interoperability webpages.

This project (www.digitalezorgondersteuning.be) has the objective of stimulating and optimizing digital communication between all professionals in the care team around a patient including the social services, patients themselves and informal caregivers where appropriate.

Software vendors are invited and incentivized for participation in interoperability test trajectories.

Currently, the following interoperability tests are OPEN for participation:

[Lot 1: Vitalink diary notes](#)

Further updates on other EFRO-1302 interoperability tests coming soon.
