

How To Use This Documentation

Getting started

eHealth

- get familiar with the basic services <https://www.ehealth.fgov.be/standards/kmehr/en>
- get familiar with usage of the technical connector <https://www.ehealth.fgov.be/ehealthplatform/nl/search?filter%5Bconnectors%5D=on>
- define which actors you need in acceptance
- request the needed certificates in acceptance environment <https://www.ehealth.fgov.be/ehealthplatform/nl/service-ehealth-certificaten>

Kmehr

- get familiar with the structure of the site <https://www.ehealth.fgov.be/standards/kmehr/en>
- get familiar with the concept of Hub communication <https://www.ehealth.fgov.be/standards/kmehr/en/web-services>
- get familiar with the structure of the Kmehrmessage <https://www.ehealth.fgov.be/standards/kmehr/en/page/specifications>

Vitalink

- DO NOT read the old "Connector Cookbooks" (at the moment only in the case of the Vitalink medicationscheme)
- get familiar with the Vitalink behaviour as Hub
- get familiar with the Vitalink usage of the Kmehrmessage specification
- read the documentation of the concerned business project
- make sure your actors have access to the Vitalink COT
- define and prepare your test patients

imec

- play around with EVS
- integrate EVS usage in your software development cycle
