Scope

This page contains the Kmehrmessages for testing the visualisation of [frequency combined with day](#).

Instructions for EVS use

IMPORTANT: This test can be performed using both the original EVSc and the new version: EVS

This test contains export files for both versions.

This [EVS export file \(EVSc\)](#) and this [EVS export file \(EVS\)](#) contains all MSE transactions used for the test.

Before starting the test, this export file should be uploaded using the EVS-action REPLACE and your own test patient.

The EVS parameter writeAsIs must be set to *false*.

Description

After reading the medication scheme, the visualisation of the frequency can be verified in the SUT.

S02R10: Combined use of Frequency and Day

Expected results

- **TS-1:** In the caretaker UI the frequency should be visualised as shown in the <Visualisation of Frequency> column in the 'Verification Table' below.
- **TS-2:** In the patient UI the frequency should be visualised as shown in the <Visualisation of Frequency> column in the 'Verification Table' below.
