Scope

This page contains the Kmehrmessages for testing the visualisation of weekly schemes.

Purpose

The purpose of this test is to proof that the medication in the weekly scheme is shown correctly.

This test is applicable for every software package that has a weekly scheme.

Instructions for EVS use

IMPORTANT: This test has to be performed using the new version of EVS.

Each test will contain an EVS export file that has to be uploaded using EVS-action REPLACE.

The EVS parameter writeAsIs must be set to **false**.

The EVS parameter shiftAction must be set to **shift_and_tag**.

IMPORTANT: This test can only be uploaded to EVS (using the EVS-actions replace) with **shift_and_tag** on tuesdays.

Once the test is uploaded with **shift_and_tag** on tuesday of the current week, you can upload it WITHOUT **shift_and_tag** for the remainder of the week.

Description

After reading the scheme, the visualisation of the weekly scheme can be verified in the SUT.

S22R10: Weekly scheme with daily medication

Preparation

1. Upload [this EVS export file](#) using the EVS-action REPLACE with a patient of your choosing.
2. Open the SUT and visualize the weekly scheme of the following week.
3. Compare the weekly scheme in the SUT to the table below.

Expected results

- **TS-1:** The weekly scheme in the SUT should be the same as the table below.

This test can only be executed on tuesday of every week. Compare the weekly scheme of the week after that tuesday to the table below.

The dates in the table below are for example the week after tuesday 07 Aug 2018.

Legend
