TS-003 (ATH-TS-09): Global logout from an application

User story

- **As a** user **I want to** logout from the application (MAIN) **So that** the IAM session and the IDP session will be closed

Initial data/state:

- user must be logged in MAIN (cf UC 5, 6 or 7)

TS dependencies:

- None

Test Script ID	Test Actions				Assertion
TS-003-01					When the test actions are performed the following assertions must be checked:
	Seq	**Actor**	**Action**	**Automatic/Manual**	MAIN application:
	1	MAIN	login into the application	see TS-001	- user is disconnected from the mobile application ○ if test fails, MAIN cannot close session
	2	MAIN	Global logout from the application	Automatic: could be automate but cannot be generic since the applications to test have all a different layout.	eHealth endpoint: - The IAM session should be closed - The IDP session should be closed
TS-003-02 Alternative test if eHealth endpoint not available					When the test actions are performed the following assertions must be checked
	Seq	**Actor**	**Action**	**Automatic/Manual**	CSAM application:
	1	MAIN	login into the application	see TS-001	- the profile is must be asked ○ if test fails, the logout was not global but local
