TS-006 (ATH-TS-23): Consult and choose a mandate

User story

- *As a user I want to login into the application (MAIN) So that I can consult the list of my mandates*
- *As a user I want to login into the application (MAIN) So that I can choose a mandate*

Initial data/state:

- a mandate with a 3rd person must be defined with mandates-csam (MD-CSAM) application. The principal must give a mandate to the agent corresponding to one or more profiles defined into the application.

Test Script ID	Test Actions				Assertion
TS-006					At point 3, the following assertions must be checked:

Test Actions table:

Seq	Actor	Action	Automatic/Manual
1	MAIN	Start an identification action	Automatic: could be automate but cannot be generic since the applications to test have all a different layout.
2	CSAM	Login via **eid** / **TOTP** / **itsME**	see TS-001
3	eHealth-IDP	Consult the list of mandates	Could be difficult to automate as CSAM and MAIN are different applications
4	eHealth-IDP	Choose a mandate	Could be difficult to automate as CSAM and MAIN are different applications
5	MAIN	/	/

Assertion:

At point 3, the following assertions must be checked:

eHealth-IDP:

- Mandate list must be displayed by the ID

At point 4, the following assertions must be checked:

eHealth-IDP:

- It redirects to the MAIN application

When the test actions are performed the following assertions must be checked (point 5):

MAIN

- must display an error if the mandate chosen doesn't have the right to connect to the application (MAIN)
- must display a welcome page relative to the mandate chosen
